Mined Land Reclamation Act
of 1975 (Section 40-8, U.C.A.,
1953, as amended), and will
employ the following re-
clamation techniques on ap-
proximately 10 acres of Leases
and Leased claims.

During Operations:

- 1) Mining will be conducted
in a safe, sound technical and
prudent miner-like manner.
- 2) Future site expansion will
salvage topsoil in advance of
development and it will be
stored in stabilized and reveg-

constructed in a manner
agreeable to the surface own-
ers and to allow for proper
drainage.
- 4) Revegetation tests will
be employed.

After Operations:

- 1) Surface debris, scrap
metal, discarded wood, and un-
useable buildings will be bur-
ied or removed from the site.
- 2) Portals, shafts, and ven-
tilation holes will be sealed
to prevent unauthorized or ac-
cidental entry.
- 3) Dumps, pads and other
disturbed sites will be stabi-
lized by rounding off outer
edges, reducing the slope of
the rock faces and regrading
drainage contours.
- 4) Compacted surfaces will
be scarified, seeded with a
grass-shrub seed mixture in
the fall, and drag covered.
- 5) Water evaporation ponds
will be reclaimed.
- 6) The main road through
the site will be left open for
access.
